

Week of April 13-17, 2020
Ms. Myers

Hello everyone. Choose 2 of the following activities for the class you are enrolled in to complete for this week. All assignments may be turned in via google classroom. Take a picture or scan it in and turn it into the corresponding assignment. Or you may turn in paper copies to the office and they will get them to me. Both choices are due by Monday, April 20 at noon. **Be sure to write whatever choice you are doing at the top of your page.**

I will be at my computer for questions on Tuesday 10a-12p, Wednesday 3p-5p & Thursday 12p-2p. **NO WORK = NO CREDIT**

Class	Choice 1	Choice 2	Choice 3	Choice 4	Choice 5
Algebra 2	Fencing the yard Project	Page 945 Lesson 1.8 even	Page 946 Lesson 2.2 all	Page 947 Lesson 2.4 all	Make a roller coaster for a marble out of only cardboard and tape. The marble must run for 30 secs exactly from start to finish. Record the run and turn it in.
Algebra 3/Trig	Khan Academy - *Graphs of $\sin(x)$, $\cos(x)$, and $\tan(x)$ *Amplitude, Midline, and Period	Page 984 Lesson 13.4 #1-24	Page 957 Lesson 5.6 #1-38 even	Page 956 Lesson 5.4 #1-30 even	Make a roller coaster for a marble out of only cardboard and tape. The marble must run for 30 secs exactly from start to finish. Record the run and turn it in.
Geometry	Fencing the yard Project	Page 824-825 Lessons 3.2-3.3	Page 822-823 Lessons 2.3-2.5	Page 133 #1-18	Make a roller coaster for a marble out of only cardboard and tape. The marble must run for 30 secs exactly from start to finish. Record the run and turn it in.
Tech Math	Fencing the yard Project	Water Park Project	Order of Operations Wkst	Dots 1 Wkst	Make a roller coaster for a marble out of only cardboard and tape. The marble must run for 30 secs exactly from start to finish. Record the run and turn it in.

Name: _____ Block: _____ Date: _____
Project Fencing Your Property

You want to put a fence around your large yard. There are two companies that you have found to do the work. They have each given you a quote for how much the work will cost. Of course, you want to find out which company will be the cheapest.

The boundary of your yard is determined by five trees. The lines connecting them form the edge of your property. Shown below are the descriptions for the positions of the trees relative to your house.

TREE	Position (relative to your house)
1	100 ft. east
2	40 ft east, 80 ft south
3	40 ft west, 120 ft south
4	90 ft west, 60 ft north
5	20 ft east, 110 ft north

STEP 1: On graph paper, mark the position of each of the trees on your land. Let each block of the graph paper represent a 10-foot by 10-foot square. Using a straightedge, connect Tree 1 to Tree 2, Tree 2 to Tree 3, Tree 3 to Tree 4, and so on.

STEP 2: Use the Pythagorean Theorem to find the length of each side of your property. Round each answer to the nearest hundredth, if necessary.

STEP 3: Determine the perimeter of your property by adding up all of the sides.

STEP 4: Company 1 says that they will complete the job for \$12 per foot of fencing. Company 2 says that they will charge you \$250 for the first 100 feet of fencing and \$15 for each additional foot. Determine the cost of fencing for both companies.

STEP 5: Figure out which company will complete the job for the least amount of money.

Name: _____ Block: _____ Date: _____

Graph of Your Property Lines

Plot the points that represent the trees that mark the edges of your property. Use the locations given on the previous page. To make things easier, use the origin (0, 0) as the position of your house. Remember that each grid represents 10 feet. Finally, connect the points using a straightedge.
